Agilent
P-Series Power Meters and Power Sensors

Preliminary Configuration Guide

P-Series Power Meters:
- **N1911A Power Meter (single channel)**
- **N1912A Power Meter (dual channel)**

P-Series Power Sensors:
- **N1921A Power Sensor (50 MHz to 18 GHz)**
- **N1922A Power Sensor (50 MHz to 40 GHz)**

Introduction

This configuration guide describes standard configurations, options and compatible accessories. Contact your local Agilent representative for additional information.

Agilent Technologies

P-Series Power Meters

The P-Series power meters provide peak, average, peak-to-average ratio, maximum and minimum power measurements, time-gated and free-run modes, rise time and fall time measurements, as well as statistical information such as the complementary cumulative distribution function (CCDF).

PC analysis software (part number N1918A) is available for complete pulse and statistical analysis.

The P-Series power meters are compatible with the 8480, E-Series and new P-Series power sensors. The P-Series power meters have a different sensor input connector than the EPM and EPM-P Series power meters, so it is necessary to use adapter cables (part numbers N1917A/B/C). When using the 8480 or E-Series sensors, refer to the Cable Accessories section in this guide. For additional information, refer to the Literature reference section.

The standard P-Series power meters include:
- Single-channel power meter, **order N1911A** or dual-channel power meter, **order N1912A**
- Input sensor connector(s) on the front panel
- Reference calibrator (1 mW, 50 MHz) connector on the front panel
- Hardcopy English-language Installation Guide
- CD-ROM, containing the English-language and localized User's Guides and the English-language Programming Guide
- Supplied accessories: power cord (plug matches country destination requirements)

P-Series Wideband Power Sensors

The P-Series wideband power sensors are designed specifically for operation with the P-Series power meters for wide bandwidth power and time measurements. These sensors are the only Agilent power sensors that have their cable hard-wired into the sensor. This provides better wide bandwidth specifications compared to having a removable cable. Refer to the Sensor Cable Lengths section in this guide for part number and cable length information.

The standard P-Series power sensors include:
- Power sensor 50 MHz to 18 GHz, **order N1921A**
- Power sensor 50 MHz to 40 GHz, **order N1922A**
- English-language Operating and Service Manual

Compatibility

Power sensor compatibility

The P-Series power meters are compatible with all current 8480, E-Series and P-Series power sensors. Refer to the Accessories section, P-Series meter cable adaptors N1917A/B and C.

Connector options for P-Series power meters

The following options are available on the P-Series power meters. [1]

Table 1. Connector options for P-Series power meters

Option	Description
N1911A-003	Rear panel sensor and power reference connectors (single channel)
N1912A-003	Rear panel sensor and power reference connectors (dual channel)

1. The P-Series power meters are configured for either front panel connectors (both sensor and power reference) or rear panel connectors. There are no options for parallel front and rear panel sensor inputs.

P-Series Power Meter Accessories

Standard accessories are available (rackmount kits etc.) as well as cable and software accessories.

Table 2. P-Series power meter accessories

Accessory part number	Description
N1911A-908 N1912A-908	Rackmount kit (one instrument)
N1911A-909 N1912A-909	Rackmount kit (two instruments)
34131A	Basic instrument transit case
34161A	Accessory pouch

Cable Accessories

Sensor cable adapters for use with 8480 and E-Series power sensors:

Table 3. Cable accessories for use with 8480 and E-Series power sensors

Accessory part number	Description
N1917A	P-Series meter cable adaptor, 1.5 m (5 ft)
N1917B	P-Series meter cable adaptor, 3 m (10 ft)
N1917C	P-Series meter cable adaptor, 10 m (31 ft)

Software Accessories

N1918A PC analysis software

PC analysis software is available for complete pulse and statistical analysis. The PC analysis software links with the P-Series power meter via the LAN, USB or GPIB interface in a PC or laptop environment. It provides the comprehensive statistical, power, frequency and time measurements that are required for radar and communications signals.

P-Series Wideband Power Sensor Cable Lengths

Three fixed cable length options are available for the P-Series power sensors at 1.5 m, 3.0 m and 10 m.

Table 4. P-Series wideband power sensor cable lengths

Option	Description
N1921A-105 N1922A-105	Fixed 1.5 m (5 ft) cable length
N1921A-106 N1922A-106	Fixed 3 m (10 ft) cable length
N1921A-107 N1922A-107	Fixed 10 m (31 ft) cable length

Calibration Option

The P-Series power meters and sensors are available with **Option 1A7 (ISO17025 compliant calibration)**.

Service and Support Options

The P-Series power meters and sensors are supplied with a 1-year customer return repair service as standard.

Table 5. Service and support options

Option	Description
R1280A	Return-to-Agilent – warranty and service plan
R1282A	Return-to-Agilent – calibration plan

Documentation

The P-Series power meters provide a hardcopy Installation Guide which includes all languages, and a CD-ROM which contains the User's Guide and Programming Guide. The following tables supply the option number as well as the Agilent part number (where appropriate) to order the documentation. The localized options for the P-Series power meters provide a hardcopy of the localized User's Guide and an English language hardcopy of the Programming Guide.

The P-Series power sensors provide a hardcopy of the Operating and Service Manual as standard.

Table 6. Documentation

Option	Documentation
N1911A-0B0 N1912A-0B0	Delete manual set
N1911A-0BK N1912A-0BK	English language manual set (hardcopy User's Guide, part number N1912-90002, and Programming Guide, part number N1912-90009)
N1911A-0BW N1912A-0BW	Service Guide (part number N1912-90015)
N1911A-ABD N1912A-ABD	German localization, User's Guide part number N1912-90005
N1911A-ABE N1912A-ABE	Spanish localization, User's Guide part number N1912-90006
N1911A-ABF N1912A-ABF	French localization, User's Guide part number N1912-90003
N1911A-ABJ N1912A-ABJ	Japanese localization, User's Guide part number N1912-90007
N1911A-ABZ N1912A-ABZ	Italian localization, User's Guide part number N1912-90004
N1921A-0B1 N1922A-0B1	Additional English language manual set, Operating and Service Manual, part number N1920A-90007

Agilent Technologies' Test and Measurement Support, Services, and Assistance
Agilent Technologies aims to maximize the value you receive, while minimizing your risk and problems. We strive to ensure that you get the test and measurement capabilities you paid for and obtain the support you need. Our extensive support resources and services can help you choose the right Agilent products for your applications and apply them successfully. Every instrument and system we sell has a global warranty. Support is available for at least five years beyond the production life of the product. Two concepts underlie Agilent's overall support policy: "Our Promise" and "Your Advantage."

Our Promise
Our Promise means your Agilent test and measurement equipment will meet its advertised performance and functionality. When you are choosing new equipment, we will help you with product information, including realistic performance specifications and practical recommendations from experienced test engineers. When you use Agilent equipment, we can verify that it works properly, help with product operation, and provide basic measurement assistance for the use of specified capabilities, at no extra cost upon request. Many self-help tools are available.

Your Advantage
Your Advantage means that Agilent offers a wide range of additional expert test and measurement services, which you can purchase according to your unique technical and business needs. Solve problems efficiently and gain a competitive edge by contracting with us for calibration, extra-cost upgrades, out-of-warranty repairs, and onsite education and training, as well as design, system integration, project management, and other professional engineering services. Experienced Agilent engineers and technicians worldwide can help you maximize your productivity, optimize the return on investment of your Agilent instruments and systems, and obtain dependable measurement accuracy for the life of those products.

Agilent T&M Software and Connectivity
Agilent's Test and Measurement software and connectivity products, solutions and developer network allows you to take time out of connecting your instruments to your computer with tools based on PC standards, so you can focus on your tasks, not on your connections. Visit **www.agilent.com/find/connectivity** for more information.
